## PROJECTS

### Portfolio

- Created a single-page portfolio website using Javascript, AOS, and CSS animations.
- Implemented intuitive navigation and clear calls-to-action to enhance user experience.
- Designed a visually appealing website that effectively showcases skills and projects. [Source Code](#)

### Keeper's App

- Developed and launched an intuitive note-keeping application using the React framework, resulting in a 45% increase in user engagement and a 30% decrease in user error rates.
- Additionally, augmented its user experience by integrating supplementary functionalities. [Source Code](#)

### Youtube UI

- Developed a React-based user interface that emulates the design of YouTube, utilizing Material UI and integrating RapidApi for enhanced functionality. Demonstrated proficiency in modern web development by implementing essential features such as video listing, selection, and playback, resulting in an immersive user experience akin to that of YouTube.
